# CASINO MEGA JACKPOT SYSTEM

CMS Progressive is a powerful floor-wide system that drives increased revenues via industry leading technology. It adds higher levels of player excitement, improves players loyalty to most table games including Roulette, with the use of multi-level event mystery prizes.

Advanced technology, reliability and quality are the basis of all development «CMS Group» LLC.

The "Jackpot sum" would enable the casino to offer to the players maximum payouts over and above the current payouts. And these increased payouts would be funded by the players progressive bet.
