

WHEEL OF FORTUNE

"Wheel of Fortune" has its own Jackpot with higher hit frequency. For taking part in this bonus game, player has to place additional side bet together with bet on the main side bet on the sensor.

After the bet accepted the blue light is ON on the sensor showing to the player that he's in with a chance.

If the player's card matches with the card on the «Wheel of Fortune» screen - he pulls the handle of the «Wheel of Fortune» first level. On the second level player could win entire Wheel of Fortune Jackpot amount.

Wheel of Fortune is great fun for the players. They hear the sounds of the game and are constantly seeing - what some table just won, cheering for each other.

NEW FEATURE

Play by credits account is new unique feature allows to the players never miss the winning combination, and place side bet on the sensor automatically each hand from personal account created right on the gaming table.

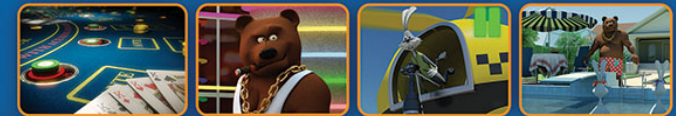

TABLE DISPLAY

You can program screen effects and text with a Jackpot data flow over the custom animations on each of the displays. CMS Progressive incorporates the high resolution wide screen Progressive Display. On screen design it can be re-skinned and themed to integrate with any base table game and reinforce your casino brand.

Our system has a big library of preinstalled 3D-animation and videos for winning combinations and promotions. This library always updates with new content.

Picture in Picture function (PIP).

SENSORS

Colorful sensors increase table drop, player attraction and safety of the game.

You will always see clearly how many chips the player has actually put on the sensor (the sensor has a digital display).

When the player bets on the sensor, the green color changes on red, indicating bet acceptance.

Sensors are also designed for reversible tables.

All sensors are totally water resistant and has a break-resistant polycarbonate glass.
