

HIGHLY FUNCTIONAL DISPLAY FOR ANY BACCARAT/PUNTO BANCO TABLE

CMS BACCARAT Display allows you to show Baccarat cards and game results in real time directly from the third party automatic shoes. Once the data is received, the CMS BACCARAT Display automatically updates the selected Baccarat trends and show the results on an electronic scorecard.

Its manual input keypad also enables dealers to quickly record the results of each baccarat hand once complete.

Dual language: English, Chinese. Show dealt cards & Predictions. Main Road History, Big Eye, Cockroach Road history etc.

MULTIMEDIA

The CMS software system links together stand-alone casino displays and allows operators to configure them from one central point. With a few clicks, casinos can make real-time edits to specific displays across the gaming floor. With CMS software system, operators can easy communicate with their players.

With CMS software system, Casinos are able to:

- Configure display content in real time from a central point.
- Instantly modify table min/max.
- Publish custom messages about upcoming events at gaming tables around the casino.
- Display different file-types advertise, including streamed video.
- Schedule advertise videos coming on the screens in a pre-defined order.

The built-in software will store all statistics including all numbers, black/red, even/odd 1/2/3 dozens first/second, spin quantity and deviation. All data displayed has graphical presentation and provide easy-to-read diagrams illustrating acceptable and unacceptable levels of performance and bias. You can find out a biased sector of a wheel, in which the ball drops more often, and move or adjust your wheel.

Set up features are accessed by a simple to use user interface. All data Stores for an indefinite period and can be backed up. Different passwords for different access level makes the software secure and convenient to use.
